DETAILED ACTION

Election/Restrictions

Restriction to one of the following g inventions is required under 35 U.S.C. 121:

- Claims 1 9, drawn to a method for contouring a workpiece for the manufacture of an automotive fuel tank filler tube, classified in class 72, subclass 370.25.
- II. Claims 10 20, drawn to a method for contouring a workpiece for the manufacture of an automotive instrument panel support beam, classified in class 72, subclass 370.24.
- III. Claim 21, drawn to a method for contouring a workpiece for an article of manufacture, classified in class 72, subclass 370.26.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the

Art Unit: 3725

particulars of the subcombination as claimed because: Does not require "stopping a first drawing motion by detecting a predetermined displacement of said starting metal tube from the contour of the contoured die". The subcombination has separate utility such as: Could be used in any automotive part.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because: Do nor required " for the manufacture of an automotive fuel tank filler tube or an automotive instrument panel support beam". The subcombination has separate utility such as: Could be used in any automotive part.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because: Do not required "stopping a first drawing motion by detecting a predetermined displacement of said starting metal tube

as: Could be used in any automotive part.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Hung C. Le whose telephone number is 571-272-8757.

The examiner can normally be reached on M-F: 08:00am - 05:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Derris Banks can be reached on 571-272-4419. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
